HCPCS DEVICE CATEGORY C-CODES CODING GUIDE

HCPCS DEVICE CATEGORY C-CODES

INTRODUCTION

Abbott offers a reimbursement hotline, which provides live coding and reimbursement information from dedicated reimbursement specialists. Please direct your questions to our Hotline support which is available from 8 a.m. to 5 p.m. central time, Monday through Friday at (855) 569-6430. Hotline reimbursement assistance is provided subject to the disclaimers set forth in this guide.

DISCLAIMER

This document and the information contained herein is for general information purposes only and is not intended, and does not constitute, legal, reimbursement, business, clinical, or other advice. Furthermore, it is not intended to and does not constitute a representation or guarantee of reimbursement, payment, or charge, or that reimbursement or other payment will be received. It is not intended to increase or maximize payment by any payer. Similarly, nothing in this document should be viewed as instructions for selecting any particular code, and Abbott does not advocate or warrant the appropriateness of the use of any particular code. The ultimate responsibility for coding and obtaining payment/reimbursement remains with the customer. This includes the responsibility for accuracy and veracity of all coding and claims submitted to third-party payers. In addition, the customer should note that laws, regulations, and coverage policies are complex and are updated frequently, and, therefore, the customer should check with its local

carriers or intermediaries often and should consult with legal counsel or a financial, coding, or reimbursement specialist for any questions related to coding, billing, reimbursement or any related issues. This update reproduces information for reference purposes only. It is not provided or authorized for marketing use.

The Medicare Hospital Outpatient Prospective Payment System (OPPS) requires providers to report device category C-codes on claims in order to improve the claims data used to annually update the OPPS payment rates. Based on the CY2020 OPPS Final Rule, CMS will no longer implement specific procedure-to-device or device-to-procedure edits for any APCs. Instead, CMS has created claims processing edits that require any device codes used in previous device-to-procedure edits to be included on claims that include procedure codes assigned to device-dependent APCs.

HCPCS AND REVENUE CODES

Revenue codes help hospitals categorize services provided by revenue center. Medicare utilizes revenue codes for cost reporting purposes. For Medicare, revenue codes must be included for each service on a CMS 1450 (UB-04) claim form. It may be appropriate for hospitals to capture the cost of products used for the procedures described above within Revenue Code 0278 (Medical/Surgical Supply – Other Implant) or Revenue Code 0360 (Operating Room Services - General). Health Care Common Procedural Coding System (HCPCS) codes include level I codes (CPT⁺ Code, described above) and level II codes (other products, supplies, and services not included in CPT⁺ Code).
